

## The iPad Integrated Curriculum

We started our iPad program in June 2010 and never looked back. It was and remains an instant game changer. Not only do our kids learn faster with the iPad, they are developing a depth of understanding that is quite stunning. For children 4 years and above and we are starting to email real time reports on language development. More will follow as better programs with email functionality become available.

Visit our [web site](#) for the reviews of the " iPad Application " that we use.

## Nobody Does It Better! The Rainbow Healthy Hot Lunch Program

### Experience the Magic At Rainbow

- A large playground
- Qualified teachers
- Flexible 5/3/2 day and half day Programs
- Optional Hot Lunch Program
- Computers and iPads
- Cooperates with CCRC, GAIN, CALWORKS and DCFS
- A Nurturing and Loving Environment

## Dr. Maria Montessorri

Maria Montessori (1870 - 1952) was born in Italy in 1870, and subsequently became Italy's first female doctor in 1896.

At the age of 28 she became the director of a school with very difficult children. She spent long hours at the school developing her own approach to learning, and after two years, these children, who had formerly been considered ineducable, took a school examination along with normal children and passed successfully.

In 1907, she was presented the opportunity to apply her educational theories to normal children. She was given the responsibility of establishing a school for the 50 children living in an impoverished tenement building. The property's owner was tired of the children's vandalism and offered Dr. Montessori her first chance to set up her concept of what a child-centered environment should be.

From these early beginnings developed a method of education that has spread around the world. In 1929 Dr. Montessori founded AMI (Association Montessori Internationale) to establish and coordinate training centers to authentically prepare teachers. Dr. Montessori, who's legacy includes being nominated three times for the Nobel Peace Prize, died in Holland in 1952, and today more than

# Give Your Child The Best Start in Life

## OUR MISSION

One of our key goals is to teach your child discipline, a sense of order and the love of learning.

Before your child learns anything we teach them concentration skills, social skills and good habits like putting away things.

Once this essential foundation has been established, we gradually introduce them to new concepts within a controlled environment. Each child is free to explore what interests them with careful guidance from the teacher.

The goal of Montessori is not to fill your child with facts, but to encourage them to learn at their own pace. When your child learns to love the concept of learning, they will learn by themselves for years to come.

## PROGRAMS

We offer two distinct programs; Infant/toddler care and Preschool (Hybrid Montessori) for ages 2-6 years.

The main part of our school program is designed towards the **Preschool program** and uses a Hybrid **Montessori** teaching method to stimulate and prepare your child for kindergarten and primary school.

As a Hybrid Montessori we adopt "best practices" from all the latest child development theories that will benefit your child the most. That means we are receptive to adopting the most innovative methods in early childhood education.

---

Stimulate their minds early. The gift of an education can never be taken back.

---

Established for over 18 years, Rainbow Montessori School, provides a loving and nurturing environment for your child.

Research has shown that children who are introduced to a focused program of learning have a significantly higher success rate in leading a balanced and productive life.

Using the renowned Montessori preschool system, a small school size and a large outdoor play yard, we provide a fun and exciting setting that your child will instantly like.

## MONTESSORI SUBJECTS

- Practical Life Exercises
- Sensorial Exercises
- Mathematics
- Language
- Cooking & Nutrition
- Arts & Crafts
- Science and Nature
- Music
- Geography
- History
- Cultural Awareness
- Social Skills Development

## TUITION

Whether you need a full time or a part time program we have a flexible schedule and payment program to suit your needs.

## MEALS

Parents may send their child a nutritional lunch or opt to join our optional "hot lunch" program.

## OUTDOOR PLAY

Children enjoy outdoor play twice daily. All outdoor activities are supervised by teachers. Activities include sand and water play, movement, games and free play.

## ENVIRONMENT

Our top priority is the safety of your child. A written report is made for any incident so parents are kept informed.

## Kids Gardening Project March-June
